Chief, Medium Machinery Branch, D/I

Monthly Report for April 1958

- copy filed
- Notes in 'form monthly report re status of projects, etc.

1. Accomplishments.

A. Branch Projects Submitted --

2 April -- ORR Project No. 34.1558, Production of Chemical Equipment in the USSR was submitted for Division review.

B. Status of Projects --

34.1928 -- European Trade in Machinery and Transport Equipment, 1950-57. A draft copy of this project has been completed and submitted for branch review. It is probable that it will be submitted to the Division in May.

34.1931 -- Production of Chemical Equipment in Czechoslovakia. A draft copy has been completed and is undergoing Division review. This project still suffers from the limited amount of data that is available on the chemical equipment industries of Czechoslovakia. Although it is doubtful that this report warrants publication as an RR, it may be possible to recast it as an IM.

25X1A9a30.1535 -- Industrial Capital Investment in Communist China. [redacted] and staff have done some preliminary editing of this project. The prose is still unnecessarily complicated and certainly not lucid. Some additional rewriting will be done in the branch. A more serious problem is developing with regard to substance. More recent information from Communist China indicates that the ratio between investment in heavy vs. light industry may not decline to 6-1 as suggested in 30.1535, but may increase over the amounts allocated in the First Five-Year Plan. We are now looking at the report in light of this information to determine what substantive changes would be necessary.

34.1930 -- Foundry Production -- A Major Bottleneck in Soviet Machine Building. The original scope of this report was ambitiously entitled Problems in Soviet Machinery Building. This proved to have too broad a scope and the coverage of this project has been reduced to more workable dimensions. Good data is still very scarce. As shown in the study of the production of forge-press equipment, the Soviets release very little data or factual information on a backward branch of industry until impressive progress has been made. The first draft of this report,

SUBJECT: Monthly Report for April 1958

well underway, has been interrupted temporary because of the recent and unexpected Soviet HIE requirements placed upon the branch.

25X1X

C. Other Contributions Submitted --

16 April -- ORR Project No. 30.1864, Estimated Production of Specific Industries in the Sino-Soviet Bloc, 1957 (UNAP)

D. Other --

- 2 April -- Contributions to OCI Periodic Requirements List, USSR.
- 24 April -- Requirements on trends in the engineering industries of Communist China.
- 25 April -- Review of ORR Project No. 42.2036, New Data and Prospects for European Foreign Trade.
- 30 April -- Contributions to OCI Periodic Requirements (PRL) Far East, 1 June-30 September 1958.

2. Training.

25X1A9a

[REDACTED] is attending the intermediate Russian reading [REDACTED] is attending the Seminars in French and Russian. [REDACTED] is continuing a self-study course in Russian, using language laboratory in M Building.

SUBJECT: Monthly Report for April 1958

3. Trips.

25X1A5a1

4. Administration.

21 April -- Revision of FY 1959 project outlines.

25X1A6a

5. Plans.

Reading requirements have been revised to represent the interests of I/MS which starts operation on May 4, 1958.
